SUMMARY

Computer Science Engineering student with strong interest in Software Development, Artificial Intelligence and Full-Stack Development. Hands-on experience in Python, HTML, CSS and Java with academic projects. Quick learner with good problem solving, communication and teamwork skills, seeking internship opportunities to apply and enhance technical knowledge.

EDUCATION

B.E. in Computer Science Engineering, City College of Engineering & Technology, Bengaluru (2023–2027)
PUC Science, Raja Nalvadi Venkatappa Nayak P.U Science College

PROJECTS

Intelligent Traffic System for Urban Conditions using Real-Time Vehicle Tracking

- Designed an AI-based concept for real-time traffic monitoring and congestion prediction.
- Focused on improving traffic flow through intelligent data analysis.

Decentralized Voting System

- Developed a secure web-based voting application emphasizing transparency and authentication.
- Implemented user-friendly voting workflow using web technologies.

Smart Glass for the Visually Impaired

- Academic project aimed at assisting visually impaired users through smart technology.

TECHNICAL SKILLS

Languages: Python, C (Basic), Java (Basic)

Web: HTML, CSS

Soft Skills: Problem Solving, Communication, Observation, Decision Making

CERTIFICATIONS

- Java Full Stack Web Development
- Agentic AI Saksham
- Green Skills & Artificial Intelligence
- Python Programming for Agentic AI
- Industrial Readiness Skill Development

LANGUAGES

Kannada, English
